

UCSC PLAZA

Team Amlesh The Great

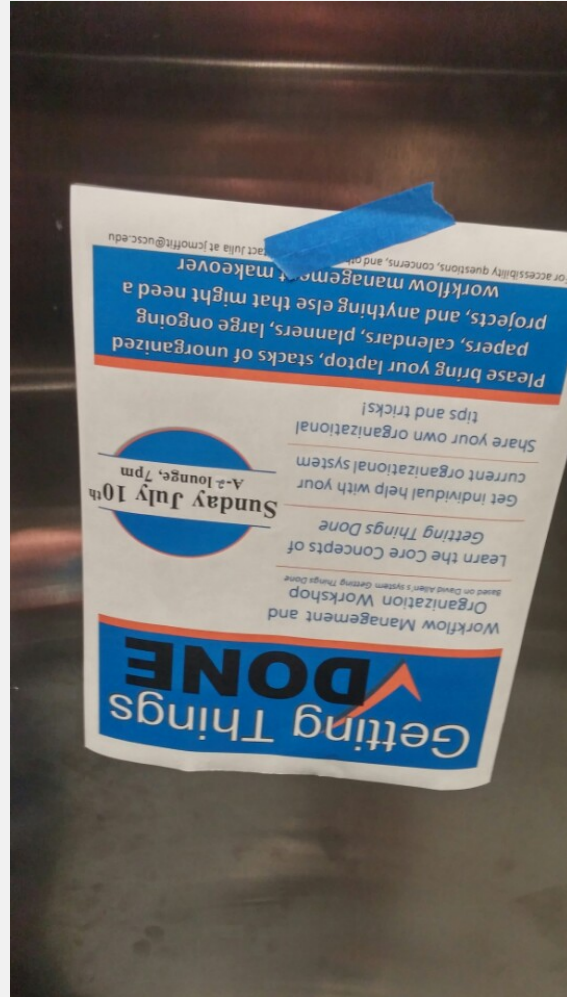

Kyungmin So(PO) Youngsoo Jang

Hobin Ryu Seungwoo Lee

Amlesh Sivanantham James Garbagnati

Seem bad to some people

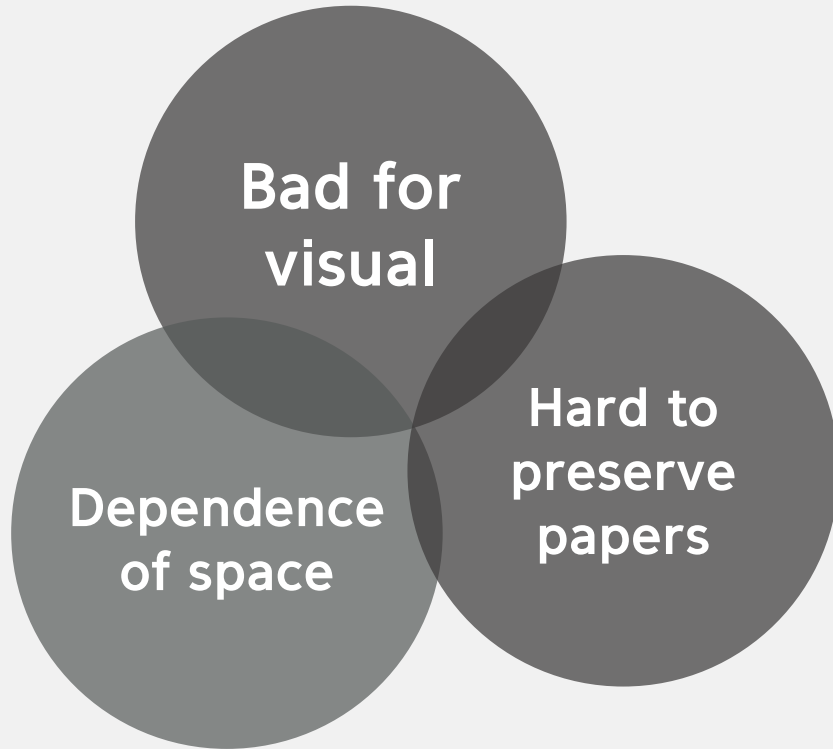

Can be
easily detached

Hard to gather people

Together is better!

UCSC PLAZA

**Hard doing Activities,
which need people.**

Web application

Display Event
Location on the map

Only UCSC Students

Need UCSC Email
Verification

UCSC PLAZA

Uploding events

Gather people
Noticing events

Apply events

Host can accept or reject

Improve the
interaction among
UCSC student

Deliver event
efficiently and nicely.

Gather people
Manage events
More easily

Achievements

Only ucsc student by email verification

User can post, delete event

User can apply event.

Writer can accept or reject application.

User can filter event list, and marker appear on map

User manage event

Failed

User can't comment, evaluate to event.

Socialization function is all failed.

Calendar is not connected with web application

Effects

Visually clean

Independence from space

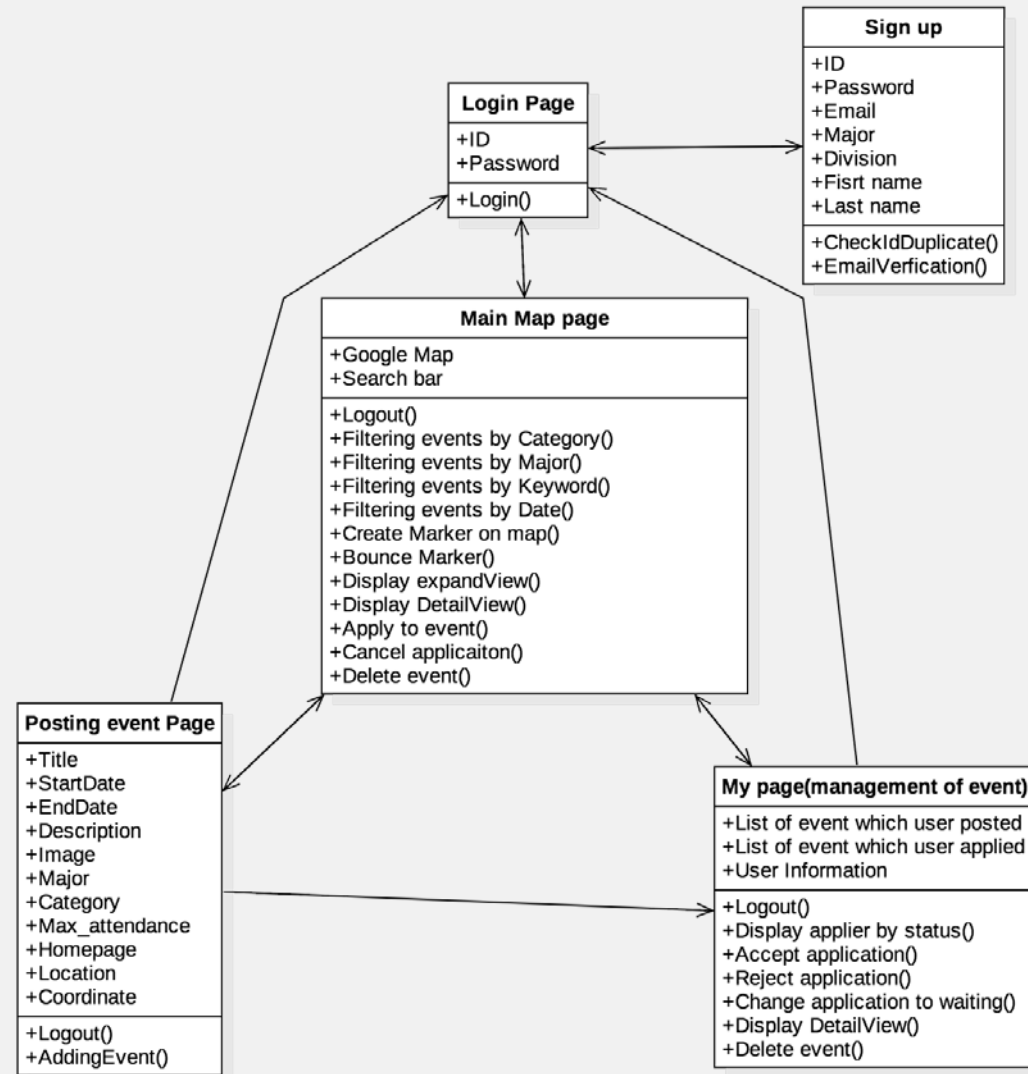

Permanently remaining events

Eco – friendly

Doing lots of activities easily

Technologies

Front-end : HTML, CSS, JAVASCRIPT

Back-end : PHP5, APACHE

Database : MySQL

Server : AWS (EC2)

Project Management Technics

Slack, Github

Seungwoo want to play a soccer.

But he has difficulty in gathering many friends to hold a soccer match.

He has no choice but gather his friends of friends of friends.

However, with UCSCPlaza, what he should do is just upload an soccer match event to our web page.

He can also make new friends after the match.

Amlesh wants to study for a quiz of CMPS 115.

But he didn't attend the classes at all, so he doesn't know what to study and how to study for the quiz.

He tried to study,

but it's too hard to study alone from the bottom.

If he never knew this service, he would have given up studying.

Thanks to UCSCPlaza, he can gather the study group, and he got an A+!

Challenges

Communication

Unfamiliar with web development

Making user friendly UI (design)

Short development duration

Accomplish

Good friendship with team member

Success of development web application

Learned web development, Scrum

Enjoyed

Make friends and doing together

Learn and experience Web development

Not Enjoyed

Short duration, but many tasks

Failure of Git (merge conflicts)

Setting development environment in server (PHP Session)

Importance of communication

Estimating effort time is difficult

Uniformity of coding standard is necessary

Scrum is good process for software development
